

15-pattern benchmark: maze_quality (top) vs Bellot $F = v/\delta$ (bottom)

(a) maze_quality: gap = +0.711, 0/9 misclass (perfect)

(b) Bellot F (Bellot 2021 §3.4): TRUE mean = 100.9, PSEUDO mean = 292.2, gap = -191.3. 4 of 9 PSEUDO score LOWER than DFS — direct failure.

maze_quality: perfect 0/9 separation. Bellot F : 4 of 9 PSEUDO below DFS (Spiral + 3x $F=0$) — smoking gun.
