

Sweep analysis (122 OK runs, 8 mask $\times$ 4 maxFam $\times$ 4 seed, 40 $\times$ 60 grid, 200 pop $\times$ 500 gen)

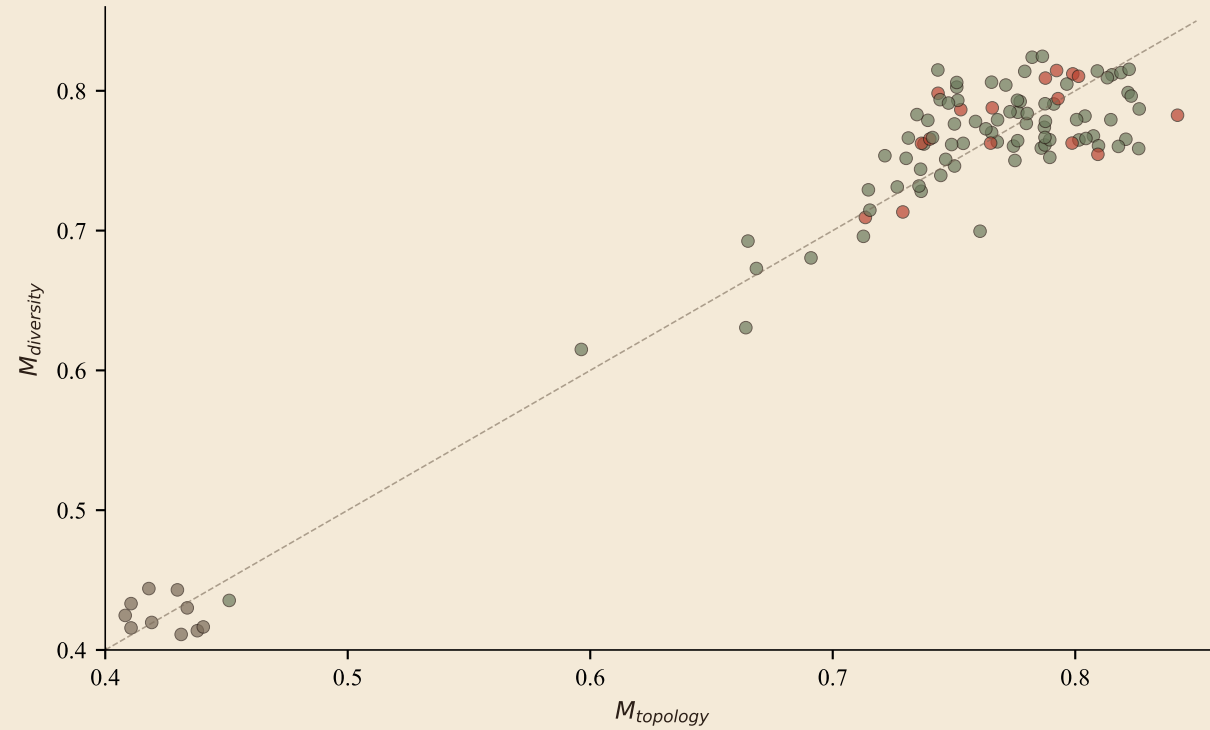

(A) Per-mask distribution

(B) Mean $\downarrow$, peak $\uparrow$ with maxFam (occasional breakthrough)

(C) Topology vs diversity (dashed: $y = x$)

(D) Top-1 decomposition (manhattan-2, mf=8, seed=444, 0.8233)
